

HACKATHON BROCHURE

STAY LATE AND CODE 2019

SLAC 2019

Stay Late and Code (SLAC) is the annual 24 hour college level hackathon at Amrita School of Engineering, Bangalore conducted by the school's CSE Departmental Forum, FACE where the participants at the event appear from colleges all across South India.

At SLAC, we provide the participants with a platform, provide them with all the required facilities for a hackathon and a conducive environment to support effective coding. SLAC gives undergraduate students an opportunity to meet like minded individuals from other institutions and share ideas and opinions.

PAST EDITIONS

20+

COLLEGES

SUCCESS MANTRA

In the past 8 versions of SLAC, we have witnessed a total of 2000+ undergraduate students develop effective software solutions born out of ideas that store the potential of being life changing breakthroughs in their respective domains.

After the success of our past hackathons, SLAC is back with a greater vision and a theme that is largely relevant in today's world. We aim to continue our legacy and scale up the grandeur and effectiveness of SLAC within the student coding community.

TEAM FACE

SLAC 2019 is organized by FACE (Forum for Aspiring Computer Engineers), the CSE Departmental forum at ASE-B. FACE is a pro-coding technical club at college and we conduct workshops, coding events and tech talks at college. The recent ICIC (International Conference on Intelligent Computing) 2018 at ASE-B was co-organized by FACE. FACE is also largely supported by ACM, Codechef and CSI student chapters at ASE-B.

The Topcoder Open (TCO) 2018 Regional Finals were held at Amrita School of Engineering and FACE was privileged to learn event organizing and conducting from the highly reputed global crowd-sourcing leaders.

THE THEME

The rapid advent of technology has no doubts made the lives of humanity way easier than what our ancestors lived once. But, humanity has caught an insatiable thirst for development, thirst that sees no means of being quenched. Contrary to popular belief, it is not development that is mankind's antagonist, rather it is unsustainable development that is hurting us the most.

Team FACE believes that the use of clean code and open source platforms coupled with creativity and a pinch of an EVS lesson at college, can produce the most efficient and sustainable solutions for the future. In wake of this, the theme for SLAC 2019 is the **United Nations Sustainable Development Goals.**

SUSTAINABLE DEVELOPMENT GOALS

WHY SPONSOR ?

FEEDBACK

Get Live feedback of APIs and products from the students at the hackathon.

CONDUCT WORKSHOPS

Elite Sponsors can conduct workshops and tutorials within the campus.

BRAND RECOGNITION

Your company name would be associated with all SLAC related publicity.

RECRUITING

Hire promising talent from amongst the participants to provide internships.

SPONSORSHIP TIERS

	Kilo	Mega	Giga
Cost	Rs. 10,000 /-	Rs. 30,000 /-	Rs. 60,000 /-
Brand Promotion on Website, Twitter, Instagram			
Logo on Posters, Banners			
Get Featured in Video Teaser			
Send Judges			
Organize Workshop			

EXTRAS ? DEFINITELY!

- Giga Sponsors are most welcome to give their own problem statements as special prizes, share IP rights with teams for the solutions created and hire talent from the hackathon for internships or jobs.
- Giga Sponsors will be recognized as Co-Organizers for the event.
- Mega and Giga Sponsors are most welcome to set up their product stalls at the venue.

If you have any custom requirements, please feel free to contact the
SLAC Team.
